The Alton Senior

In the late 1920's the Board of Education put up before the population a new series of bonds. These school bonds were to be very important in the future of Alton. With this money a new and beautiful building was to be erected. The most modern architecture and conveniences went into the making of this structure. A famous landscape artist was hired to plan our campus and to grow plants on the muddy slopes. In 1929 Alton Senior High School was completed.

High School

The building and the campus make up the most imposing sight in Alton. Every summer improvements, such as landscaping and painting, are made on the building. This year one thousand, four hundred and thirty-seven students attended school in this building.

ADMINISTRATION

The Board of Education

Rowena Waggoner, *Secretary*; G. L. Davis; E. K. Elfgen; Raymond Ready, *Assistant Superintendent*; H. E. Meyer; J. B. Johnson, *Superintendent*; C. J. Schlosser, *President of the Board*; R. L. Goulding; John Jehle, *Engineer*; L. J. Misegades; Dr. F. A. Morrison.

The Board of Education and the Administrative Staff meet around this table on the second and fourth Wednesdays of each month to study and discuss the problems of the Alton Community Consolidated School District No. 151. The policies formed at these meetings govern the education of the young men and young women of this community.

Members of the Board of Education should be congratulated for the time and effort they give to the students of the Alton area. During the past year the Members of the Board of Education have worked many hours in planning for the future of the Alton youth. We hope that their long-range program of building, repairs, maintenance, construction of new buildings, and educational planning will furnish excellent opportunities for all the boys and girls of the Alton School District.

Again we say thanks to the Board of Education. Your time is appreciated.

JAMES B. JOHNSON, *Superintendent of the Alton Public Schools*

Mr. Johnson became a member of the staff of the Alton Public School System in 1929. He was appointed principal-teacher of Clara Barton in 1934. Since that time his progress has been rapid. Successive appointments have been as follows: 1937 principal-teacher of Horace Mann; 1942 principal-teacher of Milton; 1943 principal of East Junior High School, and in 1945 principal of Alton High School.

In 1947 he was appointed superintendent of the Alton Public School System. In this important administrative position he has shown an ability to grasp the large and intricate educational problems of the System. In addition, he has lost none of his friendly interest in the large numbers of the student body whom he learned to know so well as principal of our High School. We all agree that he is as popular as our superintendent as he was as our principal.

SPORTS

Athletics at Alton High

RAY JACKSON, *Director of Athletics*

The Alton public schools are indeed fortunate to have Mr. Ray Jackson as Director of Athletics. This fall, he gave up his position as football coach in order to devote more time to improving the entire athletic department. His long years of experience will be invaluable in building and improving our athletic department.

An Idea That Grew In Alton

Way back in 1903 a little store called GATELY'S opened in Alton with a revolutionary idea - - - an idea that working folk - - - the great majority of middle classes - - - were trustworthy just as well as the rich folk, - - - and that if they could buy on credit, consumption would be greater which would surely make for greater production and lower prices.

The idea worked. Today it is estimated over 85 per cent of the nation's goods is bought on credit. The wisdom of this seems apparent when you observe that even the most humble American enjoys more worldly goods than any other people on earth.

We have no illusions of grandeur, therefore, do not believe the philosophy of this institution has been a factor of consequence in bringing this about, however, we are proud, that each year throughout the past 45 years, it has been our privilege to serve more and more people, having grown from a tiny store to one of Alton's largest and finest department stores - - Obviously a store whose "ideas" have grown in Alton and Alton has grown with them - - - that's why we say - - - "GATELY'S LOVES ALTON and ALTON LOVES GATELY'S."

YOU HAVE A FUTURE IN GLASS

Seventy-five years ago when we started business your grandfather considered glass a luxury. Today it is all around you and has become commonplace — but it is still a luxury.

A luxury because it meets your every need in a simple convenient manner.

The future of glass is assured and its use will multiply during your lifetime to the extent that your future will literally be surrounded by glass.

Perhaps some day you will be one of us in helping make both our futures possible.

THE NEW WORLD OF METALS

Bronze and its first cousin, brass, went into the service of human progress when man's only home was a cave. Today the whole world benefits from the countless new products of American industry . . . products in which brass is playing a major role in the fields of electronics, transportation, communication, personal and household conveniences.

Being man-made, the usefulness of brass and all other copper-base alloys is limited only by the skill, resourcefulness and research that go into their making. At Western Brass Mills, sheets, strips, long coils and drawn and fabricated parts of these metals are made with the exactitude of a pharmacist filling a prescription. Where special temper, ductility, rigidity or finish is required, Western delivers metal as specified . . . tailor-made to the individual requirement.

New uses for Western metals turn up day by day. As each evolves, special problems must be met. For, while all products seek to change and improve the shape of everyday living, none can successfully deny the basic laws of chemistry and metallurgy. These laws guide us in the making of every pound of Western metal. We sell not mere metal, but the opportunity for manufacturers to reduce production costs, increase the serviceability and all 'round value of their products.

It is Western's old-time habit of keeping abreast of all that is new that makes all of the other divisions of Olin Industries so proud of their mutual partnership with progress.

The school year of '48-'49 has come to a close and with it the production of another great Tatler comes into being.

The Staff has endeavored to keep in mind the things which will set a calendar of school activities for the past year. All of your activities help produce the Tatler. We owe a great "Thanks" to Miss Williamson for her time and wonderful advising she has given us.

We hope that when one has perused his copy of the '49 Tatler, he contracts the feeling of love and deep appreciation for his Alma Mater. When this occurs then our efforts shall not have been in vain.
